Introduction to Phylogenetic Analysis

Tuesday 23 – Wednesday 24 July, 2013

School of Biological Sciences

Overview

This workshop will provide an introduction to phylogenetic analysis, leading to a focus on the Bayesian methods and models implemented in the software *BEAST*. The first day of the workshop is aimed at researchers who are interested in phylogenetic analysis but who have little or no experience in this area. The second day is intended for researchers interested in Bayesian phylogenetic analysis and who are likely to use it in the near future. Attendance at the first day of the workshop should provide sufficient background knowledge for the second day.

The workshop will be run by Associate Professors Simon Ho and Nate Lo, along with other members of the *Molecular Ecology, Evolution, & Phylogenetics* (MEEP) lab in the School of Biological Sciences, University of Sydney. Participation in this workshop is free, but registration is essential. For registration and other inquiries, please contact Simon (simon.ho@sydney.edu.au).

Programme

The workshop will include 6 lectures given over 2 days. The first day will include introductory lectures on interpreting phylogenetic trees, sequence alignment, evolutionary models, phylogenetic methods, and Bayesian methods. The second day will include advanced lectures on Bayesian phylogenetic analysis, including estimating timescales, demographic reconstruction, and species trees.

Practical sessions will be held on both days of the workshop. They will involve basic analyses of a prepared data sets using desktop PCs. Participants are welcome to bring their own laptops, provided that you have installed the software that will be used in the practical sessions. We will be using free software that can be installed on PC, Mac, and UNIX platforms.

Location

The workshop will be held in the School of Biological Sciences at the University of Sydney. Lectures will be held in the DT Anderson Lecture in the Heydon-Laurence Building (A08). Practical classes will be held in the Robert Brown Laboratory in the Macleay Building (A12). Both of these buildings are adjacent to Parramatta Rd and are within reasonable walking distance (20 minutes) or a short bus ride from Central Station. Please refer to the campus map at the end of this programme.

Tuesday 23 July: Introductory topics

9.30 – 09.45 **Welcome**
Simon Ho

9.45 – 10.15 **Introduction to Phylogenetic Analysis**
Nathan Lo

- Introduction to phylogenetic analysis
- Interpreting phylogenetic trees
- DNA sequence alignment

10.30 – 11.15 **Phylogenetic Methods**
Nathan Lo

- Maximum parsimony
- Evolutionary models
- Distance-based methods
- Maximum likelihood

11.30 – 12.30 **Bayesian Phylogenetic Analysis**
Simon Ho

- The Bayesian paradigm
- Markov chain Monte Carlo sampling
- Advantages and disadvantages

13.30 – 16.30 **Practical 1: The evolution of ratite birds**
Simon Ho, Sebastián Duchêne, & Frank Jia

Wednesday 24 July: Advanced topics

9.30 – 10.15 **Bayesian Phylogenetics: Rates and Timescales**
Sebastián Duchêne

- The molecular clock
- Relaxed molecular clocks
- Calibrating the molecular clock

10.30 – 11.15 **Bayesian Phylogenetics: Analysing Populations**
Simon Ho

- Interspecific *vs* intraspecific data
- Coalescent theory
- Skyline-plot methods
- Bayesian phylogeography

11.30 – 12.00 **Bayesian Phylogenetics: Gene Trees and Species Trees**
Simon Ho

- Inferring species trees from gene trees
- Bayesian inference of species trees

13.00 – 16.00 **Practical 2: A mysterious hominin from Siberia**
Simon Ho, Sebastián Duchêne, & Frank Jia

Optional post-workshop practical
Practical 3: The extinction of the cave bear

During the workshop

Places to eat

On campus

- Courtyard Café (Holme Building)
- Taste (New Law Building)
- Various food outlets (Manning Building)

Near campus

- Forest Lodge Hotel (Forest Lodge)
- Uni Thai (Broadway)
- Clipper Café (Glebe Point Rd)
- La Banette Patisserie (Glebe Point Rd)
- Various Japanese, Chinese, SE Asian (Broadway, Glebe Point Rd)
- Little Devil Bakery (Broadway)
- Food court (Broadway Shopping Centre)

Things to do on campus

- **Macleay Museum**
  The Macleay Museum had its origins in the collection of insects begun by Alexander Macleay in the late eighteenth century. It has developed into an extraordinary collection of natural history specimens, ethnographic artifacts, scientific instruments and historic photographs. Admission is free. Open 10-4.30 Monday-Friday.
- **Nicholson Museum**
  The Nicholson Museum contains the largest and most prestigious collection of antiquities in Australia. It is also the country's oldest university museum, and features masterpieces of ancient art and objects of daily life from Egypt, the Middle East, Greece, Rome, Cyprus and Mesopotamia. Admission is free. Open 10-4.30 Monday-Friday.
- **University Art Gallery**
  Founded in the 1860s, the University of Sydney Art Collection now holds more than 3,000 paintings, sculptures and works on paper by Australian, Asian and European artists. The University Art Gallery showcases changing exhibitions of works from the collection as well as high quality exhibitions of both contemporary and historical works. Admission is free. Open 10-4.30 Monday-Friday.
